Wario couldn't believe it! It had been such a lovely day, with not a cloud in the sky—a perfect day to fly his plane. Then, without warning, his engine began to sputter, and Wario crash-landed in the woods! He spent the rest of the afternoon wandering amongst the trees and underbrush, muttering to himself about his miserable luck. Without looking where he was going, Wario stumbled right into a cave!

Inside the cave, he found a beautiful music box, but no matter how much Wario wound it up, no song could be heard. "What's-a this?!? It must-a be brok . . ." But before he could finish, Wario vanished with a flash! Only the music box remained, right where Wario had found it.

Wario soon awoke to very different surroundings, and it wasn't long before he realized he was inside the music box! A mysterious figure informed Wario that he had once ruled the world inside the music box, until an evil being sealed away his magical powers in five music boxes.

Naturally, Wario wasn't too interested in this story . . . that is, until the figure promised to send Wario back to his own world and let him keep any treasure he found, if he'd only recover the hidden music boxes, thereby breaking the seal that had locked away the hidden figure's powers. Enticed by the thought of returning to his own world with a cache of treasure, Wario departed on his quest—in search of the music boxes and the many treasures of this mysterious land!

Useful Techniques

Unfortunately, when you start the game, Wario is not very skilled. Learn these basic techniques to help you on your way!

- Rolling Jump

Crouch on a hill to start rolling, then press the A Button to jump! That's the rolling jump! While you're spinning, you can break blocks and knock down enemies!

- Jumping Attack

If you press the A Button to jump while pressing the B Button, you can perform a jumping attack! You'll be able to break blocks and knock down opponents that are just out of reach.

- Crouching Jump

If you jump while you're crouching, you just might be able to get into some tight spots! To perform a crouching jump, press the A Button while holding \blacktriangle on the + Control Pad.

- Crouching Slide

Press \blacktriangle on the + Control Pad while pressing the B Button to perform a crouching slide! You can only slide a little, though.

1

Choose a Level!

The Map Screen shows which levels Wario can enter. Wario can go to any of the displayed levels at any time. (At first, Out of the Woods is the only level available.) Use the + Control Pad to move Wario to a level and press the A Button to enter.

2

Search for the Keys!

When you enter a level, the first thing you should do is start looking for the keys! There are four different colored keys – gray, red, green and blue. However, you can't necessarily find all four keys right away. The levels can change, and by powering up, Wario can access new areas.

PLAYING THE GAME!

Playing through Wario Land 3 can be kind of tough, so read this section carefully!

START!

3 Find the Treasure Chests!

Once you find a key, try to find the treasure chest of the same color. If you have the correct key, simply touch the treasure chest to get its hidden treasure!

4 Events!

When you've finished looking at the Clear Screen, an event may occur, depending on the treasure you've found. However, finding a single item won't necessarily start an event. Some events may not occur until two or three related items have been found. There may also be times when no event occurs at all, so don't be too disappointed!

5 Levels Increase!

Find changes in the map and the levels! Depending on the events that occur, you may find that new levels have been opened or that there have been changes in levels you've already cleared. Head for new levels or any levels you think may have changed. You may be able to find keys and chests that you couldn't find before and get your hands on new treasure!

Repeat steps 1 through 5 until you collect all 100 treasures and the 5 music boxes needed to break the seal!

Auto-Save

Return to Step 1

If you re-enter a level you have already cleared, you will start from the beginning without having collected any keys. However, in the place of any chests you have already opened, you will find a goal door. If you've re-entered a level but can't find a new key or chest, go to the goal door to exit the level and return to the map.

STARTING THE GAME!

Properly insert your Wario Land 3 Game Pak into your Game Boy Color system. (You cannot play Wario Land on Game Boy or Game Boy pocket systems. Be sure to use Game Boy Color.) After turning the power ON, the introduction will be shown. Choose New Game and press the A Button. Next, select either English or Japanese and press the A Button to start your game.

If you press the B Button on the Map Screen, **arrows** will appear indicating the places Wario can go to from his current position! These can be a big help!

♦ The Many Different Blocks

There are many different blocks that just seem to get in your way, no matter what you do. Try as you might, you can't break them all!

Even Wario's most basic attacks can break these blocks.

Wario can break these blocks when he's on fire.

These blocks break when you throw something at them.

Fatten yourself up with doughnuts to break these blocks.

You can break these blocks after you power up.

Only Snowman Wario can break these blocks!

♦ The Many Different Coins

Normal Coins: 1 Coin Each

Gray, Red, Blue and Green Coins: 10 Coins Each

♦ Time Attack Mode

Once you meet certain conditions, you can play the Time Attack model! Certain conditions?! What could they be?!

WARIO'S NEW REACTIONS!

Wario may be invincible, but when he's attacked by his enemies he takes damage. Just like in Wario Land II™, this game is chock-full of laughable reactions!

♦ Electric Wario

When Wario is attacked by a particular enemy, he suffers an electric shock! It's mind-numbingly shocking!

♦ Ball o' String Wario

If a certain enemy manages to entangle Wario, he rolls up into a ball of string and goes rolling all around! Where he will stop is anyone's guess!

♦ Invisible Wario

If you catch the mysterious potion thrown by a particular enemy, Wario disappears! You can't see him, but he's there nonetheless. He can still bump into enemies or fall down holes, but if the "eyes" that watch can't see him, then . . .

Here He Is!

♦ Ice Skatin' Wario

When Wario takes a blast of icy breath from a particular enemy, he turns into a block of ice. He goes skidding away until he hits something hard and shatters the ice!

♦ Snowman Wario

If Wario gets buried in snow, he turns into a beautifully round snowman! Brrrr . . . It's cold! This round snowman looks ready to roll away!

♦ Vampire Wario

When Wario touches a particular enemy, he turns into a vampire! Wah, hah, hah, HAH!

If you access the Save Screen and choose Action Help while you are Vampire Wario, you can see an explanation of Vampire Wario's abilities! You can also see controls for other special abilities at certain times, so be sure to take a peek every once in a while!

As Vampire Wario, he can change to bat form or vampire form. Each form gives Wario different abilities! Press the B Button to transform. To get back to normal you must . . . hmm, what could this vampire's weakness be?

WARIO'S TROUBLESOME ENEMIES!

Now it's time to introduce Wario's restless and impertinent enemies! Use your head when you pound these pesky creeps! Even if you manage to knock them all away, they'll reappear as soon as you go through a doorway or move to and from another screen! Watch out!

Spearhead

Watch out for this stubborn Goom. "One little spear is all I need!"

Hammer-bot

This robot roams around looking for something to pound on with its mighty hammer arms. If you get hit with its hammers, you may just bounce right back in response!

Mad Scienstein

One look at this crazy labcoat, and you know he's trouble. He's pouring his heart into his latest scientific formula and its miraculous effects. "Science is my life!"

Spear-bot

This mass-produced robot sees Spearhead as its chief rival in chasing Wario. "In the end, technology always wins out!"
